                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The sequence data in this record represents an 'enhanced' verzion of a Phase 2 submission, Specifically, the indicated order and orientation of each sequence contig has been established using one or more of the following read pair data from individual subclones, overlaps with neighboring clones, alignment with available reference sequence (e-g', human), and/or confirmation by Pog testing. In addition, the sequence assembly is based on at least W average coverage in 000 bases and has been reviewed to rate out gross missasemblies, the low-quality ends of sequence contigs have been triumed any, and each base is associated with a Priph desired quality secore.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       NOTE: This is a 'working draft' sequence it currently consists of 12 contists daps between the contest is believed to be correct as given, however the sizes of the gaps between them are based on estimates that have provided by the submittor.

This sequence will be replaced the accession number will be preserved.

By the finished sequence as soon as it is available and the accession number will be preserved.

It currently consists of 5 contigs. The true order of the places is not known and their order in this sequence record is arbitrary. Gap between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Pan troglodytes

LINCHEM: BAODDYS RES. COMMUN. 211:586-589 (1995).

LINCTION: ANY CATALYZE THE DERABATION OF INTERCELLULAR CONTENUES STRUCTURES IN THE CORNITIONED LAYER OF THE SKIN IN THE CONTINUOUS SHEDDING OF CELLS FROM THE SKIN SHERAKE. SPECIFIC FOR ANNIO ACUD RESLIDUES WITH ACOMATIC SIDE CHAINS IN THE PL POSITION. SCCE CHAPES INTELLAN B CHAIN AT 6-LU-1-(-VS-7, 16-YR-1-JU-1), 25-PHB-1-TH-36, AND 26-TYR-1-TH-27, COULD PLAY A ROLE IN THE SKIN AND IS PRECURSORS TO INFLAMATORY CYNCHIES.

1- TISSUE SPECIFICITY: IT 18 ADMINIATIVE EXPRESSED IN THE SKIN AND IS LAXERSSED SHE MERCHANDER OF DEPLIBATION VERY LOW LEVELS ARE ALSO SEEN IN THE BRAIN AND KINDEY. PARTIC SHE CONTINUES AND SEEN IN THE BRAIN AND KINDEY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Skytt A., Stroemgvist M., Egelrud T.;

**Primary substrate specificity of recombinant human stratum corneum

**Primary substrate specificity of recombinant human stratum corneum
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         "Epidermal overexpression of stratum corneum chymotryptic enzyme in mice; a model for chronic ithchy dermatitis.";

Isold-000259-2; sequence-VEP 005401;
TISSUE SECTIFICITY: ISOSOMN 1 IS RECOMBINANTLY EXPRESSED IN THE
BANCHEAS WHILE ISOSOMN 2 15 EXPRESSED IN NEIGHT BRAIN AND
BITPOCOMPUS: OPHT PORMS ARE ALSO FOUND IN FETAL BRAIN AND
PALCHMY. NOT DETECTED IN KINNEY, SPLESN, LIVER AND LUNG.
STALLMARTY: BECAMOS TO PETITOASE PAULY SI. KALIKKEIN SUBFAMILY.
